AMENDMENTS TO THE CLAIMS

- 1. (currently amended) An isolated nucleic acid which encodes a polypeptide comprising the amino acid sequence set forth in SEQ ID NO: 2-or a fragment thereof.
- 2. (previously presented) The isolated nucleic acid of claim 1, wherein the nucleic acid has the nucleotide sequence set forth in SEQ ID NO: 1.
- 3. (original) The isolated nucleic acid of claim 1, wherein the nucleic acid is DNA or RNA.
- 4. (currently amended) The isolated nucleic acid of claim 1[[2]], wherein the nucleic acid is cDNA or genomic DNA.
 - 5-14. (canceled)
- 15. (original) The isolated nucleic acid of claim 1, wherein the nucleic acid is labeled with a detectable marker.
- 16. (original) The isolated nucleic acid of claim 15, wherein the detectable marker is a radioactive isotope, a fluorophor or an enzyme.
- 17. (currently amended) An <u>isolated nucleic acid</u> eligenucleotide of at least 15 nucleotides capable of specifically hybridizing with <u>complementary to</u> the <u>entire</u> sequence of the nucleic acid of claim 1.
 - 18. (canceled)
- 19. (currently amended) The <u>isolated nucleic acideligenucleotide</u> of claim 17, wherein the <u>isolated nucleic acideligenucleotide</u> is labeled with a detectable marker.

- 20. (currently amended) The <u>isolated nucleic acideligonucleotide</u> of claim 19, wherein the marker is a radioactive isotope, a fluorophor or an enzyme.
 - 21-22. (canceled)
 - 23. (original) A vector comprising the isolated nucleic acid of claim 1.
- 24. (previously presented) The vector of claim 23, further comprising a promoter or an expression element linked to the nucleic acid.
- 25. (original) The vector of claim 23, wherein the promoter comprises a bacterial, yeast, insect or mammalian promoter.
- 26. (previously presented) The vector of claim 24, wherein the vector is a plasmid, cosmid, yeast artificial chromosome (YAC), BAC, P1, bacteriophage or eukaryotic viral DNA.
 - 27. (currently amended) An isolated host cell containing the vector of claim 23.
- 28. (currently amended) The <u>isolated</u> host cell of claim 27, wherein the host cell is a prokaryotic or eukaryotic cell.
- 29. (currently amended) The <u>isolated</u> host cell of claim 28, wherein the eukaryotic cell is a yeast, insect, plant or mammalian cell.
- 30. (currently amended) A method for producing a polypeptide comprising culturing the host cell of claim 27[[3]] under conditions suitable for production of the polypeptide and recovering the polypeptide from the host cell culture.
- 31. (previously presented) A method of obtaining a polypeptide in purified form comprising:
 - (a) introducing the vector of claim 23 into a suitable host cell;
 - (b) culturing the resulting cell so as to produce the polypeptide;

- (c) recovering the polypeptide produced in step (b); and
- (d) purifying the polypeptide.

32-57. (canceled)

58. (previously presented) The isolated nucleic acid of claim 1, wherein said nucleic acid is used as a probe to diagnose a condition selected from the group consisting of megakaryocytic abnormality, hematopoietic disorder, myeloproliferative disorder, platelet disorder, leukemia and neural abnormalities.
